

Treatment Discussion Guide

If your doctor has determined that the hallucinations and delusions you have experienced are related to Parkinson's disease, use the following questions to help guide the conversation with your specialist. Having more background information can help you learn more about your treatment options available for this condition.

TREATMENT OPTIONS

1. What are the treatment options to manage this condition?
2. How do you evaluate these different treatment options?
3. Has the FDA approved any medicines for Parkinson's-related hallucinations and delusions?

CONSIDERATIONS

4. What is the most important thing I should know about these medicines?
5. What are the potential side effects of these medicines?
6. Can I take these treatments with Parkinson's disease medicines?
7. What is your experience with prescribing these types of medicines?

ACCESS

8. How do I get these medicines?
